

JDK	JRS	JEP	Feature	Type	Category
8	337	101	Generalized Target-Type Inference	Feature	Language Improvements
8	337	103	Parallel Array Sorting	Feature	Library Improvements
8	337	104	Annotations on Java Types	Feature	Language Improvements
8	337	105	DocTree API	Feature	Tooling Improvements
8	337	106	Add Javadoc to javax.tools	Feature	Tooling Improvements
8	337	107	Bulk Data Operations for Collections	Feature	Library Improvements
8	337	109	Enhance Core Libraries with Lambda	Feature	Library Improvements
8	337	112	Charset Implementation Improvements	Feature	Library Improvements
8	337	113	MS-SFU Kerberos 5 Extensions	Feature	Security Libraries Enhancements
8	337	114	TLS Server Name Indication (SNI) Extension	Feature	Security Libraries Enhancements
8	337	115	AEAD CipherSuites	Feature	Security Libraries Enhancements
8	337	117	Remove the Annotation-Processing Tool (apt)	Feature	Maintenance and Clean Up
8	337	118	Access to Parameter Names at Runtime	Feature	Language Improvements
8	337	119	javax.lang.model Implementation Backed by Core Reflection	Feature	Library Improvements
8	337	120	Repeating Annotations	Feature	Language Improvements
8	337	121	Stronger Algorithms for Password-Based Encryption	Feature	Security Libraries Enhancements
8	337	122	Remove the Permanent Generation	Feature	Performance and Runtime Advancements
8	337	123	Configurable Secure Random-Number Generation	Feature	Security Libraries Enhancements
8	337	124	Enhance the Certificate Revocation-Checking API	Feature	Security Libraries Enhancements
8	337	126	Lambda Expressions & Virtual Extension Methods	Feature	Language Improvements
8	337	127	Improve Locale Data Packaging and Adopt Unicode CLDR Data	Feature	Library Improvements
8	337	128	BCP 47 Locale Matching	Feature	Library Improvements
8	337	129	NSA Suite B Cryptographic Algorithms	Feature	Security Libraries Enhancements
8	337	130	SHA-224 Message Digests	Feature	Security Libraries Enhancements
8	337	131	PKCS#11 Crypto Provider for 64-bit Windows	Feature	Security Libraries Enhancements
8	337	133	Unicode 6.2	Feature	Library Improvements
8	337	135	Base64 Encoding & Decoding	Feature	Library Improvements
8	337	136	Enhanced Verification Errors	Feature	Tooling Improvements
8	337	138	Autoconf-Based Build System	Feature	Improving Productivity for OpenJDK Developers
8	337	139	Enhance javac to Improve Build Speed	Feature	Tooling Improvements
8	337	140	Limited doPrivileged	Feature	Security Libraries Enhancements
8	337	142	Reduce Cache Contention on Specified Fields	Feature	Performance and Runtime Advancements
8	337	147	Reduce Class Metadata Footprint	Feature	Performance and Runtime Advancements
8	337	148	Small VM	Feature	Performance and Runtime Advancements
8	337	149	Reduce Core-Library Memory Usage	Feature	Library Improvements
8	337	150	Date & Time API	Feature	Library Improvements
8	337	153	Launch JavaFX Applications	Feature	Tooling Improvements
8	337	155	Concurrency Updates	Feature	Library Improvements
8	337	160	Lambda-Form Representation for Method Handles	Feature	Performance and Runtime Advancements
8	337	161	Compact Profiles	Feature	Library Improvements
8	337	162	Prepare for Modularization	Feature	Library Improvements
8	337	164	Leverage CPU Instructions for AES Cryptography	Feature	Security Libraries Enhancements
8	337	166	Overhaul JKS-JCEKS-PKCS12 Keystores	Feature	Security Libraries Enhancements
8	337	170	JDBC 4.2	Feature	Library Improvements
8	337	171	Fence Intrinsics	Feature	Performance and Runtime Advancements
8	337	172	DocLint	Feature	Tooling Improvements
8	337	173	Retire Some Rarely-Used GC Combinations	Feature	Maintenance and Clean Up
8	337	174	Nashorn JavaScript Engine	Feature	Tooling Improvements
8	337	176	Mechanical Checking of Caller-Sensitive Methods	Feature	Security Libraries Enhancements
8	337	177	Optimize java.text.DecimalFormat.format	Feature	Library Improvements
8	337	178	Statically-Linked JNI Libraries	Feature	Performance and Runtime Advancements
8	337	179	Document JDK API Support and Stability	Feature	Stewardship & Governance
8	337	180	Handle Frequent HashMap Collisions with Balanced Trees	Feature	Library Improvements
8	337	184	HTTP URL Permissions	Feature	Security Libraries Enhancements
8	337	185	Restrict Fetching of External XML Resources	Feature	Security Libraries Enhancements
9	379	102	Process API Updates	Feature	Library Improvements
9	379	110	HTTP 2 Client	Feature	Library Improvements
9	379	143	Improve Contended Locking	Feature	Performance and Runtime Advancements
9	379	158	Unified JVM Logging	Feature	Monitoring
9	379	165	Compiler Control	Feature	Tooling Improvements
9	379	193	Variable Handles	Feature	Language Improvements
9	379	197	Segmented Code Cache	Feature	Performance and Runtime Advancements
9	379	199	Smart Java Compilation, Phase Two	Feature	Improving Productivity for OpenJDK Developers
9	379	200	The Modular JDK	Feature	Library Improvements
9	379	201	Modular Source Code	Feature	Improving Productivity for OpenJDK Developers
9	379	211	Elide Deprecation Warnings on Import Statements	Feature	Tooling Improvements
9	379	212	Resolve Lint and Doclint Warnings	Feature	Tooling Improvements
9	379	213	Milling Project Coin	Feature	Language Improvements
9	379	214	Remove GC Combinations Deprecated in JDK 8	Feature	Maintenance and Clean Up
9	379	215	Tiered Attribution for javac	Feature	Tooling Improvements
9	379	216	Process Import Statements Correctly	Feature	Tooling Improvements
9	379	217	Annotations Pipeline 2.0	Feature	Tooling Improvements
9	379	219	Datagram Transport Layer Security (DTLS)	Feature	Security Libraries Enhancements
9	379	220	Modular Run-Time Images	Feature	Library Improvements

9	379	221	Simplified Doclet API	Feature	Tooling Improvements
9	379	222	jshell: The Java Shell (Read-Eval-Print Loop)	Feature	Tooling Improvements
9	379	223	New Version-String Scheme	Feature	Stewardship & Governance
9	379	224	HTML5 Javadoc	Feature	Tooling Improvements
9	379	225	Javadoc Search	Feature	Tooling Improvements
9	379	226	UTF-8 Property Files	Feature	Library Improvements
9	379	227	Unicode 7.0	Feature	Library Improvements
9	379	228	Add More Diagnostic Commands	Feature	Tooling Improvements
9	379	229	Create PKCS12 Keystores by Default	Feature	Security Libraries Enhancements
9	379	231	Remove Launch-Time JRE Version Selection	Feature	Tooling Improvements
9	379	232	Improve Secure Application Performance	Feature	Security Libraries Enhancements
9	379	233	Generate Run-Time Compiler Tests Automatically	Feature	Improving Productivity for OpenJDK Developers
9	379	235	Test Class-File Attributes Generated by javac	Feature	Improving Productivity for OpenJDK Developers
9	379	236	Parser API for Nashorn	Feature	Library Improvements
9	379	237	Linux/AArch64 Port	Feature	New Platform Support
9	379	238	Multi-Release JAR Files	Feature	Tooling Improvements
9	379	240	Remove the JVM TI hprof Agent	Feature	Maintenance and Clean Up
9	379	241	Remove the jhat Tool	Feature	Maintenance and Clean Up
9	379	243	Java-Level JVM Compiler Interface	Feature	Performance and Runtime Advancements
9	379	244	TLS Application-Layer Protocol Negotiation Extension	Feature	Security Libraries Enhancements
9	379	245	Validate JVM Command-Line Flag Arguments	Feature	Tooling Improvements
9	379	246	Leverage CPU Instructions for GHASH and RSA	Feature	Security Libraries Enhancements
9	379	247	Compile for Older Platform Versions	Feature	Tooling Improvements
9	379	248	Make G1 the Default Garbage Collector	Feature	Performance and Runtime Advancements
9	379	249	OCSP Stapling for TLS	Feature	Security Libraries Enhancements
9	379	250	Store Interned Strings in CDS Archives	Feature	Performance and Runtime Advancements
9	379	251	Multi-Resolution Images	Feature	Library Improvements
9	379	252	Use CLDR Locale Data by Default	Feature	Library Improvements
9	379	253	Prepare JavaFX UI Controls & CSS APIs for Modularization	Feature	Library Improvements
9	379	254	Compact Strings	Feature	Library Improvements
9	379	255	Merge Selected Xerces 2.11.0 Updates into JAXP	Feature	Library Improvements
9	379	256	BeanInfo Annotations	Feature	Library Improvements
9	379	257	Update JavaFX/Media to Newer Version of GStreamer	Feature	Library Improvements
9	379	258	HarfBuzz Font-Layout Engine	Feature	Library Improvements
9	379	259	Stack-Walking API	Feature	Library Improvements
9	379	260	Encapsulate Most Internal APIs	Feature	Library Improvements
9	379	261	Module System	Feature	Library Improvements
9	379	262	TIFF Image I/O	Feature	Library Improvements
9	379	263	HiDPI Graphics on Windows and Linux	Feature	Library Improvements
9	379	264	Platform Logging API and Service	Feature	Monitoring
9	379	265	Marlin Graphics Renderer	Feature	Performance and Runtime Advancements
9	379	266	More Concurrency Updates	Feature	Library Improvements
9	379	267	Unicode 8.0	Feature	Library Improvements
9	379	268	XML Catalogs	Feature	Library Improvements
9	379	269	Convenience Factory Methods for Collections	Feature	Library Improvements
9	379	270	Reserved Stack Areas for Critical Sections	Feature	Performance and Runtime Advancements
9	379	271	Unified GC Logging	Feature	Monitoring
9	379	272	Platform-Specific Desktop Features	Feature	Library Improvements
9	379	273	DRBG-Based SecureRandom Implementations	Feature	Security Libraries Enhancements
9	379	274	Enhanced Method Handles	Feature	Performance and Runtime Advancements
9	379	275	Modular Java Application Packaging	Feature	Tooling Improvements
9	379	276	Dynamic Linking of Language-Defined Object Models	Feature	Language Improvements
9	379	277	Enhanced Deprecation	Feature	Language Improvements
9	379	278	Additional Tests for Humongous Objects in G1	Feature	Improving Productivity for OpenJDK Developers
9	379	279	Improve Test-Failure Troubleshooting	Feature	Improving Productivity for OpenJDK Developers
9	379	280	Indify String Concatenation	Feature	Performance and Runtime Advancements
9	379	281	HotSpot C++ Unit-Test Framework	Feature	Improving Productivity for OpenJDK Developers
9	379	282	jlink: The Java Linker	Feature	Tooling Improvements
9	379	283	Enable GTK 3 on Linux	Feature	Library Improvements
9	379	284	New HotSpot Build System	Feature	Improving Productivity for OpenJDK Developers
9	379	285	Spin-Wait Hints	Feature	Performance and Runtime Advancements
9	379	287	SHA-3 Hash Algorithms	Feature	Security Libraries Enhancements
9	379	288	Disable SHA-1 Certificates	Feature	Security Libraries Enhancements
9	379	289	Deprecate the Applet API	Feature	Maintenance and Clean Up
9	379	290	Filter Incoming Serialization Data	Feature	Security Libraries Enhancements
9	379	291	Deprecate the Concurrent Mark Sweep (CMS) Garbage Collector	Feature	Maintenance and Clean Up
9	379	292	Implement Selected ECMAScript 6 Features in Nashorn	Feature	Library Improvements
9	379	294	Linux/s390x Port	Feature	New Platform Support
9	379	295	Ahead-of-Time Compilation	Feature	Performance and Runtime Advancements
9	379	297	Unified arm32/arm64 Port	Feature	New Platform Support
9	379	298	Remove Demos and Samples	Feature	Maintenance and Clean Up
9	379	299	Reorganize Documentation	Feature	Stewardship & Governance
10	383	286	Local-Variable Type Inference	Feature	Language Improvements
10	383	296	Consolidate the JDK Forest into a Single Repository	Feature	Improving Productivity for OpenJDK Developers
10	383	304	Garbage-Collector Interface	Feature	Performance and Runtime Advancements
10	383	307	Parallel Full GC for G1	Feature	Performance and Runtime Advancements

10	383	310	Application Class-Data Sharing	Feature	Performance and Runtime Advancements
10	383	312	Thread-Local Handshakes	Feature	Performance and Runtime Advancements
10	383	313	Remove the Native-Header Generation Tool (javah)	Feature	Maintenance and Clean Up
10	383	314	Additional Unicode Language-Tag Extensions	Feature	Library Improvements
10	383	316	Heap Allocation on Alternative Memory Devices	Feature	Performance and Runtime Advancements
10	383	317	Experimental Java-Based JIT Compiler	Feature	Improving Productivity for OpenJDK Developers
10	383	319	Root Certificates	Feature	Security Libraries Enhancements
10	383	322	Time-Based Release Versioning	Feature	Stewardship & Governance
11	384	181	Nest-Based Access Control	Feature	Language Improvements
11	384	309	Dynamic Class-File Constants	Feature	Language Improvements
11	384	315	Improve Aarch64 Intrinsics	Feature	Performance and Runtime Advancements
11	384	318	Epsilon: A No-Op Garbage Collector	Feature	Performance and Runtime Advancements
11	384	320	Remove the Java EE and CORBA Modules	Feature	Maintenance and Clean Up
11	384	321	HTTP Client (Standard)	Feature	Library Improvements
11	384	323	Local-Variable Syntax for Lambda Parameters	Feature	Language Improvements
11	384	324	Key Agreement with Curve25519 and Curve448	Feature	Security Libraries Enhancements
11	384	327	Unicode 10	Feature	Library Improvements
11	384	328	Flight Recorder	Feature	Monitoring
11	384	329	ChaCha20 and Poly1305 Cryptographic Algorithms	Feature	Security Libraries Enhancements
11	384	330	Launch Single-File Source-Code Programs	Feature	Tooling Improvements
11	384	331	Low-Overhead Heap Profiling	Feature	Monitoring
11	384	332	Transport Layer Security (TLS) 1.3	Feature	Security Libraries Enhancements
11	384	333	ZGC: A Scalable Low-Latency Garbage Collector (Experimental)	Experimental	Performance and Runtime Advancements
11	384	335	Deprecate the Nashorn JavaScript Engine	Feature	Maintenance and Clean Up
11	384	336	Deprecate the Pack200 Tools and API	Feature	Maintenance and Clean Up
12	386	189	Shenandoah: A Low-Pause-Time Garbage Collector (Experimental)	Experimental	Performance and Runtime Advancements
12	386	230	Microbenchmark Suite	Feature	Improving Productivity for OpenJDK Developers
12	386	325	Switch Expressions (Preview)	Preview Feature	Language Improvements
12	386	334	JVM Constants API	Feature	Language Improvements
12	386	340	One AArch64 Port, Not Two	Feature	Maintenance and Clean Up
12	386	341	Default CDS Archives	Feature	Performance and Runtime Advancements
12	386	344	Abortable Mixed Collections for G1	Feature	Performance and Runtime Advancements
12	386	346	Promptly Return Unused Committed Memory from G1	Feature	Performance and Runtime Advancements
13	388	350	Dynamic CDS Archives	Feature	Performance and Runtime Advancements
13	388	351	ZGC: Uncommit Unused Memory	Feature	Performance and Runtime Advancements
13	388	353	Reimplement the Legacy Socket API	Feature	Performance and Runtime Advancements
13	388	354	Switch Expressions (Preview)	Preview Feature	Language Improvements
13	388	355	Text Blocks (Preview)	Preview Feature	Language Improvements
14	389	305	Pattern Matching for instanceof (Preview)	Preview Feature	Language Improvements
14	389	343	Packaging Tool (Incubator)	Incubator Module	Tooling Improvements
14	389	345	NUMA-Aware Memory Allocation for G1	Feature	Performance and Runtime Advancements
14	389	349	JFR Event Streaming	Feature	Monitoring
14	389	352	Non-Volatile Mapped Byte Buffers	Feature	Performance and Runtime Advancements
14	389	358	Helpful NullPointerExceptions	Feature	Language Improvements
14	389	359	Records (Preview)	Preview Feature	Language Improvements
14	389	361	Switch Expressions (Standard)	Feature	Language Improvements
14	389	362	Deprecate the Solaris and SPARC Ports	Feature	Maintenance and Clean Up
14	389	363	Remove the Concurrent Mark Sweep (CMS) Garbage Collector	Feature	Maintenance and Clean Up
14	389	364	ZGC on macOS	Feature	New Platform Support
14	389	365	ZGC on Windows	Feature	New Platform Support
14	389	366	Deprecate the ParallelScavenge + SerialOld GC Combination	Feature	Maintenance and Clean Up
14	389	367	Remove the Pack200 Tools and API	Feature	Maintenance and Clean Up
14	389	368	Text Blocks (Second Preview)	Preview Feature	Language Improvements
14	389	370	Foreign-Memory Access API (Incubator)	Incubator Module	Library Improvements
15	390	339	Edwards-Curve Digital Signature Algorithm (EdDSA)	Feature	Security Libraries Enhancements
15	390	360	Sealed Classes (Preview)	Preview Feature	Language Improvements
15	390	371	Hidden Classes	Feature	Language Improvements
15	390	372	Remove the Nashorn JavaScript Engine	Feature	Maintenance and Clean Up
15	390	373	Reimplement the Legacy DatagramSocket API	Feature	Performance and Runtime Advancements
15	390	374	Disable and Deprecate Biased Locking	Feature	Performance and Runtime Advancements
15	390	375	Pattern Matching for instanceof (Second Preview)	Preview Feature	Language Improvements
15	390	377	ZGC: A Scalable Low-Latency Garbage Collector	Feature	Performance and Runtime Advancements
15	390	378	Text Blocks	Feature	Language Improvements
15	390	379	Shenandoah: A Low-Pause-Time Garbage Collector	Feature	Performance and Runtime Advancements
15	390	381	Remove the Solaris and SPARC Ports	Feature	Maintenance and Clean Up
15	390	383	Foreign-Memory Access API (Second Incubator)	Incubator Module	Library Improvements
15	390	384	Records (Second Preview)	Preview Feature	Language Improvements
15	390	385	Deprecate RMI Activation for Removal	Feature	Maintenance and Clean Up
16	390	338	Vector API (Incubator)	Incubator Module	Library Improvements
16	390	347	Enable C++14 Language Features	Feature	Improving Productivity for OpenJDK Developers
16	390	357	Migrate from Mercurial to Git	Feature	Improving Productivity for OpenJDK Developers
16	390	369	Migrate to GitHub	Feature	Improving Productivity for OpenJDK Developers
16	390	376	ZGC: Concurrent Thread-Stack Processing	Feature	Performance and Runtime Advancements
16	390	380	Unix-Domain Socket Channels	Feature	Library Improvements
16	390	386	Alpine Linux Port	Feature	New Platform Support
16	390	387	Elastic Metaspace	Feature	Performance and Runtime Advancements

16	390	388	Windows/AArch64 Port	Feature	New Platform Support
16	390	389	Foreign Linker API (Incubator)	Incubator Module	Library Improvements
16	390	390	Warnings for Value-Based Classes	Feature	Library Improvements
16	390	392	Packaging Tool	Feature	Tooling Improvements
16	390	393	Foreign-Memory Access API (Third Incubator)	Incubator Module	Library Improvements
16	390	394	Pattern Matching for instanceof	Feature	Language Improvements
16	390	395	Records	Feature	Language Improvements
16	390	396	Strongly Encapsulate JDK Internals by Default	Feature	Library Improvements
16	390	397	Sealed Classes (Second Preview)	Preview Feature	Language Improvements
17	390	306	Restore Always-Strict Floating-Point Semantics	Feature	Library Improvements
17	390	356	Enhanced Pseudo-Random Number Generators	Feature	Library Improvements
17	390	382	New macOS Rendering Pipeline	Feature	Library Improvements
17	390	391	macOS/AArch64 Port	Feature	New Platform Support
17	390	398	Deprecate the Applet API for Removal	Feature	Maintenance and Clean Up
17	390	403	Strongly Encapsulate JDK Internals	Feature	Library Improvements
17	390	406	Pattern Matching for switch (Preview)	Preview Feature	Language Improvements
17	390	407	Remove RMI Activation	Feature	Maintenance and Clean Up
17	390	409	Sealed Classes	Feature	Language Improvements
17	390	410	Remove the Experimental AOT and JIT Compiler	Feature	Maintenance and Clean Up
17	390	411	Deprecate the Security Manager for Removal	Feature	Maintenance and Clean Up
17	390	412	Foreign Function & Memory API (Incubator)	Incubator Module	Library Improvements
17	390	414	Vector API (Second Incubator)	Incubator Module	Library Improvements
17	390	415	Context-Specific Deserialization Filters	Feature	Library Improvements
18	393	400	UTF-8 by Default	Feature	Library Improvements
18	393	408	Simple Web Server	Feature	Library Improvements
18	393	413	Code Snippets in Java API Documentation	Feature	Tooling Improvements
18	393	416	Reimplement Core Reflection with Method Handles	Feature	Library Improvements
18	393	417	Vector API (Third Incubator)	Incubator Module	Library Improvements
18	393	418	Internet-Address Resolution SPI	Feature	Library Improvements
18	393	419	Foreign Function & Memory API (Second Incubator)	Incubator Module	Library Improvements
18	393	420	Pattern Matching for switch (Second Preview)	Preview Feature	Language Improvements
18	393	421	Deprecate Finalization for Removal	Feature	Maintenance and Clean Up
19	394	405	Record Patterns (Preview)	Preview Feature	Language Improvements
19	394	422	Linux/RISC-V Port	Feature	New Platform Support
19	394	424	Foreign Function & Memory API (Preview)	Preview Feature	Library Improvements
19	394	425	Virtual Threads (Preview)	Preview Feature	Library Improvements
19	394	426	Vector API (Fourth Incubator)	Incubator Module	Library Improvements
19	394	427	Pattern Matching for switch (Third Preview)	Preview Feature	Language Improvements
19	394	428	Structured Concurrency (Incubator)	Incubator Module	Library Improvements
20	395	429	Scoped Values (Incubator)	Incubator Module	Language Improvements
20	395	432	Record Patterns (Second Preview)	Preview Feature	Language Improvements
20	395	433	Pattern Matching for switch (Fourth Preview)	Preview Feature	Language Improvements
20	395	434	Foreign Function & Memory API (Second Preview)	Preview Feature	Library Improvements
20	395	436	Virtual Threads (Second Preview)	Preview Feature	Library Improvements
20	395	437	Structured Concurrency (Second Incubator)	Incubator Module	Language Improvements
20	395	438	Vector API (Fifth Incubator)	Incubator Module	Library Improvements
21	396	430	String Templates (Preview)	Preview Feature	Language Improvements
21	396	431	Sequenced Collections	Feature	Library Improvements
21	396	439	Generational ZGC	Feature	Performance and Runtime Advancements
21	396	440	Record Patterns	Feature	Language Improvements
21	396	441	Pattern Matching for switch	Feature	Language Improvements
21	396	443	Unnamed Patterns and Variables (Preview)	Preview Feature	Language Improvements
21	396	444	Virtual Threads	Feature	Library Improvements
21	396	445	Unnamed Classes and Instance Main Methods (Preview)	Preview Feature	Language Improvements
21	396	446	Scoped Values (Preview)	Preview Feature	Language Improvements
21	396	448	Vector API (Sixth Incubator)	Incubator Module	Library Improvements
21	396	449	Deprecate the Windows 32-bit x86 Port for Removal	Feature	Maintenance and Clean Up
21	396	451	Prepare to Disallow the Dynamic Loading of Agents	Feature	Performance and Runtime Advancements
21	396	452	Key Encapsulation Mechanism API	Feature	Security Libraries Enhancements
21	396	453	Structured Concurrency (Preview)	Preview Feature	Language Improvements
22	397	423	Region Pinning for G1	Feature	Performance and Runtime Advancements
22	397	447	Statements before super(...) (Preview)	Preview Feature	Language Improvements
22	397	454	Foreign Function & Memory API	Feature	Library Improvements
22	397	456	Unnamed Variables & Patterns	Feature	Language Improvements
22	397	457	Class-File API (Preview)	Preview Feature	Library Improvements
22	397	458	Launch Multi-File Source-Code Programs	Feature	Tooling Improvements
22	397	459	String Templates (Second Preview)	Preview Feature	Language Improvements
22	397	460	Vector API (Seventh Incubator)	Incubator Module	Library Improvements
22	397	461	Stream Gatherers (Preview)	Preview Feature	Library Improvements
22	397	462	Structured Concurrency (Second Preview)	Preview Feature	Language Improvements
22	397	463	Implicitly Declared Classes and Instance Main Methods (Second Preview)	Preview Feature	Language Improvements
22	397	464	Scoped Values (Second Preview)	Preview Feature	Language Improvements
23	398	455	Primitive Types in Patterns, instanceof, and switch (Preview)	Preview Feature	Language Improvements
23	398	466	Class-File API (Second Preview)	Preview Feature	Library Improvements
23	398	467	Markdown Documentation Comments	Feature	Tooling Improvements
23	398	469	Vector API (Eighth Incubator)	Incubator Module	Library Improvements

23	398	471	Deprecate the Memory-Access Methods in sun.misc.Unsafe for Removal	Feature	Maintenance and Clean Up
23	398	473	Stream Gatherers (Second Preview)	Preview Feature	Library Improvements
23	398	474	ZGC: Generational Mode by Default	Feature	Performance and Runtime Advancements
23	398	476	Module Import Declarations (Preview)	Preview Feature	Language Improvements
23	398	477	Implicitly Declared Classes and Instance Main Methods (Third Preview)	Preview Feature	Language Improvements
23	398	480	Structured Concurrency (Third Preview)	Preview Feature	Language Improvements
23	398	481	Scoped Values (Third Preview)	Preview Feature	Language Improvements
23	398	482	Flexible Constructor Bodies (Second Preview)	Preview Feature	Language Improvements
24	399	404	Generational Shenandoah (Experimental)	Experimental	Performance and Runtime Advancements
24	399	450	Compact Object Headers (Experimental)	Experimental	Performance and Runtime Advancements
24	399	472	Prepare to Restrict the Use of JNI	Feature	Maintenance and Clean Up
24	399	475	Late Barrier Expansion for G1	Feature	Performance and Runtime Advancements
24	399	478	Key Derivation Function API (Preview)	Preview Feature	Security Libraries Enhancements
24	399	479	Remove the Windows 32-bit x86 Port	Feature	Maintenance and Clean Up
24	399	483	Ahead-of-Time Class Loading & Linking	Feature	Performance and Runtime Advancements
24	399	484	Class-File API	Feature	Library Improvements
24	399	485	Stream Gatherers	Feature	Library Improvements
24	399	486	Permanently Disable the Security Manager	Feature	Maintenance and Clean Up
24	399	487	Scoped Values (Fourth Preview)	Preview Feature	Language Improvements
24	399	488	Primitive Types in Patterns, instanceof, and switch (Second Preview)	Preview Feature	Language Improvements
24	399	489	Vector API (Ninth Incubator)	Incubator Module	Library Improvements
24	399	490	ZGC: Remove the Non-Generational Mode	Feature	Performance and Runtime Advancements
24	399	491	Synchronize Virtual Threads without Pinning	Feature	Performance and Runtime Advancements
24	399	492	Flexible Constructor Bodies (Third Preview)	Preview Feature	Language Improvements
24	399	493	Linking Run-Time Images without JMODs	Feature	Improving Productivity for OpenJDK Developers
24	399	494	Module Import Declarations (Second Preview)	Preview Feature	Language Improvements
24	399	495	Simple Source Files and Instance Main Methods (Fourth Preview)	Preview Feature	Language Improvements
24	399	496	Quantum-Resistant Module-Lattice-Based Key Encapsulation Mechanism	Feature	Security Libraries Enhancements
24	399	497	Quantum-Resistant Module-Lattice-Based Digital Signature Algorithm	Feature	Security Libraries Enhancements
24	399	498	Warn upon Use of Memory-Access Methods in sun.misc.Unsafe	Feature	Maintenance and Clean Up
24	399	499	Structured Concurrency (Fourth Preview)	Preview Feature	Language Improvements
24	399	501	Deprecate the 32-bit x86 Port for Removal	Feature	Maintenance and Clean Up
25	400	470	PEM Encodings of Cryptographic Objects (Preview)	Preview Feature	Security Libraries Enhancements
25	400	502	Stable Values (Preview)	Preview Feature	Language Improvements
25	400	503	Remove the 32-bit x86 Port	Feature	Maintenance and Clean Up
25	400	505	Structured Concurrency (Fifth Preview)	Preview Feature	Language Improvements
25	400	506	Scoped Values	Feature	Library Improvements
25	400	507	Primitive Types in Patterns, instanceof, and switch (Third Preview)	Preview Feature	Language Improvements
25	400	508	Vector API (Tenth Incubator)	Incubator Module	Library Improvements
25	400	509	JFR CPU-Time Profiling (Experimental)	Experimental	Monitoring
25	400	510	Key Derivation Function API	Feature	Security Libraries Enhancements
25	400	511	Module Import Declarations	Feature	Language Improvements
25	400	512	Compact Source Files and Instance Main Methods	Feature	Language Improvements
25	400	513	Flexible Constructor Bodies	Feature	Language Improvements
25	400	514	Ahead-of-Time Command-Line Ergonomics	Feature	Performance and Runtime Advancements
25	400	515	Ahead-of-Time Method Profiling	Feature	Performance and Runtime Advancements
25	400	518	JFR Cooperative Sampling	Feature	Monitoring
25	400	519	Compact Object Headers	Feature	Performance and Runtime Advancements
25	400	520	JFR Method Timing & Tracing	Feature	Monitoring
25	400	521	Generational Shenandoah	Feature	Performance and Runtime Advancements
